

## Student Activity 12: Guessing Game

Let's play a guessing game.

Choose an object and take a picture of it with Flexi-Scope. You can take a picture of just part of the object to make this game more challenging!

When everyone has taken a picture of their object, look at each one and see if you can guess what it is. Can you figure out what these are?

Write down your guesses in your Flexi-Scope Journal. How many did you get right?
